PROJECTS

Daffa Cakes Web-based Point of Sale System | *Laravel, PHP, MySQL, Bootstrap* Feb. 2025 – May 2025

- * Developed a web-based POS (Point of Sale) system for Daffa Cakes, a cake business in Bogor, supporting three user roles: admin, cashier, and owner.
- * Enabled real-time sales tracking, inventory management, and automated daily reporting accessible from any device with an internet connection.
- * Improved operational efficiency, resulting in a 20% reduction in manual bookkeeping errors and faster transaction processing.
- * Helped the business owner make data-driven decisions, contributing to a measurable increase in sales through comprehensive dashboards and analytics features.

Inventory Management Web System | *Laravel, PHP, MySQL, Bootstrap* Oct. 2024 – Des. 2024

- * Developed a web-based inventory management system for a hijab retail business, transitioning from manual bookkeeping to a centralized digital solution.
- * Enabled admin to monitor stock levels, record inbound and outbound items, and generate automated inventory reports with one-click export.
- * Minimized inventory losses and human error by providing real-time tracking of stock movement and clear visibility of all transactions.
- * Streamlined business operations, reducing time spent on manual stock reconciliation by 50% and ensuring all inventory data is consistently recorded and accessible.
